Office Action Summary	Application No. 10/083,519	Applicant(s) ARMSTRONG ET AL.	
	Examiner Sumaiya A. Chowdhury	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1 is rejected under 35 U.S.C. 101 because the claim does not fall within one of the four enumerated categories of method, apparatus, process, or composition of

matter. Applicant must specify the statutory class. Claim 1 appears to be of the method class. Applicant may look at references cited to see how to construct claims.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis (6774926) in view of Aoki (6788951) and Hansen (US 2002/0038456)

As for claim 1, Ellis discloses:

A collaborative, navigable, database (50 – Fig. 1) driven format for broadcasting video on the internet (40 – Fig. 1; Users are capable of uploading video to the server which uses the internet to broadcast the video to users - col. 4, lines 5-15),

providing tools (62, 66, 68, 70 – Fig. 3) for people to upload video footage (col. 5, lines 15-45, col. 4, lines 6-11,), and text (description; 212 – Fig. 14; col. 12, lines 3-4, lines 13-16),

engage in an interactive viewing experience (The programming is available on demand – col. 10, lines 9-30),

explore the database of video clips (The user explores the video clips available by selecting to view the list (150 – Fig. 10; col. 10, lines 9-20))

However, Ellis fails to disclose that people upload images and that compound stories are created from new and existing video clips.

In an analogous art, Aoki discloses wherein a user uploads images for the advantage of preserving memory space locally or such that other users could also access the images – col. 11, lines 35-42.

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Ellis' invention to include a user uploads images, as taught by Aoki, for the advantage of not using up local memory or such that other users could also access the images.

However, Ellis and Aoki fail to disclose compound stories are created from new and existing video clips.

In an analogous art, Hansen discloses that video clips are aggregated to create videos (stories) over the internet for the advantage of generating a single video stream for an always-active video channel(s) for transmission and viewing – [0026-0027].

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Ellis and Aoki's invention to include video clips are aggregated to create videos over the internet, as taught by Hansen, for the advantage of generating a single video stream for an always-active video channel(s) for transmission and viewing.
